JAGUAR XF STANDARD FEATURES

ENGINE, TRANSMISSION AND DRIVING DYNAMICS
All Surface Progress Control
Cruise Control with Speed Limiter
Eight Speed Automatic Transmission with Jaguar Sequential Shift™
Electric Power Assisted Steering
Hill Launch Assist
Jaguar Drive Control
Torque Vectoring by Braking
EXTERIOR FEATURES
Automatic Headlights with Powerwash
Front & Rear Park Aid
Heated Rear Windscreen
Partial LED Rear Lights
Rain Sensing Windscreen Wipers
INTERIOR FEATURES
10-Way Electric, Heated Front Seats with Driver Memory
12V Power Sockets
3-Flash Lane Change Indicators
40:20:40 Split Fold Rear Seat
Auto-Dimming Rear View Mirror
Carpet Mats
Electrically Adjustable Steering Column with Memory
Front Armrest with Storage Compartment
Front Deployable Air Vents
Front Sun Visors with Illuminated Vanity Mirrors
Interior Mood Lighting
Jaguar Sense™ Overhead Lighting
Rear Centre Armrest with Cupholders
Two-Zone Automatic Climate Control

INFORMATION, COMMUNICATION AND ENTERTAINMENT
380W Meridian™ Sound System with 11 Speakers
8" Capacitive Touchscreen
Analogue Dials with 5" Full Colour TFT Display
Audio AUX
Bluetooth® Telephone Connectivity & Audio Streaming
Dynamic Volume Control
InControl Touch Navigation
iPod® Integration
Jaguar Voice
USB Socket
SAFETY AND SECURITY
Airbags - Driver and Front Passenger, Front Side, Full Length Side Window Curtain

ENVIRONMENTAL INNOVATION AT JAGUAR

Jaguar is proud to continue the company's tradition with its approach to Environmental Innovation. From the choice of lightweight materials and lean production methods to the efficiency of its engines and designs, Jaguar is committed to operating as a more sustainable business and reducing its overall environmental impact.

Jaguar's flagship XJ model was the first in the company to achieve ISO14040, the international standard for vehicle 'life cycle assessment'. This certification measures the environmental impact of XJ from component material sourcing and manufacturing process, through driving 200,000 km. But that's not all. Every new Jaguar is designed to be 85% Recyclable/Reusable and 95% Recoverable at the end of the vehicle's life.

The all-new XF, XE, XJ and F-TYPE's innovative use of lightweight aluminium, which incorporates up to 50% closed-loop recycled material from the manufacturing process of the body structures, provides considerable performance benefits. This includes improved fuel consumption and less CO₂ emissions during the use phase of the Life Cycle due to lighter structures. Our on-going target is to ensure scrap aluminium reclaimed from our stamping process is to be segregated and recycled through a closed loop system and re-melted into the same grade quality sheet, therefore reducing CO₂ emissions during the production phase of the Life Cycle. Jaguar is committed to reducing dependency on fossil fuels, using fewer resources and creating less waste as part of our approach to sustainability excellence.

The company plan includes 25% reduction targets in operating and tailpipe CO₂ emissions, waste to landfill, logistics efficiencies (15%) and water consumption (10%), all based on per vehicle built since 2007. In addition the manufacturing assembly CO₂ emissions of each Jaguar built in the UK since 2009 is 100% offset. For each tonne of CO₂ emitted in the assembly process, Jaguar invests in projects that reduce an equivalent tonne of CO₂ elsewhere. Taking into account the company's global sales growth and increased investment in more efficient operating facilities, we are proud to have delivered and in some cases exceeded our Environmental Innovation targets as planned for 2012. We have reduced our European fleet average tailpipe CO₂ emissions by 25% versus 2007 levels, based on sales up to the end of 2014.

Looking forward, we have developed our 2020 vision for sustainable business growth that focuses on continued improvements in tailpipe CO₂ emissions, operational carbon neutrality and zero waste. To date the company has offset over 6 million tonnes of CO₂, provided over 4,000 direct jobs in 60 emissions reduction projects in 17 countries and improved the lives of over 1 million people in our global cook stoves emissions reduction programme.

But it doesn't stop there. Our manufacturing facilities have been certified to ISO14001 since 1998 and we are credited to Platinum Plus level in the UK's Business in the Community Corporate Responsibility Index.

IMPORTANT NOTICE

Jaguar is consistently seeking ways to improve the specification, design & production of its vehicles & alterations take place continually. While every effort is made to produce up-to-date literature, this leaflet should not be regarded as an infallible guide to current specification/options, nor does it constitute an offer for the sale of any particular vehicle. Distributors & dealers are not agents of Jaguar by any express or implied undertaking or representation.

SPECIFICATION & OPTIONS

All pricing, specification & option levels are relevant for MY16 production at time of printing. All prices are in New Zealand dollars & include GST but exclude on road & set up costs. Jaguar New Zealand reserves the right to make changes to pricing, specification & options at any time without prior notice.
